

**RESEARCH INTERESTS** My research interest is at the intersection of Human-AI interaction, computational methods, and haptics. I study multimodal haptic perception and develop AI-powered computational systems and tools for designing perceptually grounded haptic experiences.

**EDUCATION**

|                                                                                                                                                                      |                                              |
